

WELL COMPLETION REPORT (SYNTHETIC)

OIL-BRH-012 - Borholla-012

NWIS prototype document - not an Oil India Limited operational record

API Number	OIL-ASM-000142
Field / District	Borholla / Jorhat
Block	PEL-ASSAM-07
Basin	Assam-Arakan
Formation	Tipam (TIP)
Spud / Completion	2016-10-27 / 2017-02-20
Measured / TVD	2251 m / 2195 m
Trajectory	Deviated; inc 20.4 deg; az 71.9 deg
Formation Interval	980-1705 m
Lithology	Sandstone-siltstone sequence
Pore Pressure Reference	2186 psi
Fracture Gradient	14.17 ppg
Mud System	Glycol-PHPA WBM
NWIS Well Risk	Moderate (52.3/100)

Casing Program

String	Set Depth (m)	Purpose
20 in conductor	80	Conductor
13 3/8 in casing	562	Surface
9 5/8 in casing	1305	Intermediate
7 in liner/casing	1980	Production

Significant Historical Events and Lessons

Date / Depth	Event	Severity	Evidence / mitigation / lesson
2017-02-04 1962 m	Mud Loss	Critical	Intermittent circulation losses developed while drilling ahead. Mitigation: Spot graded LCM pill and circulate at reduced rate. Lesson: Track flow balance and pit volume trend before losses become severe.
2017-02-04 1973 m	Stuck Pipe	Critical	Rotary movement deteriorated progressively. Mitigation: Apply approved freeing procedure and avoid excessive overpull. Lesson: Rising torque plus falling ROP should trigger hole-cleaning action.
2017-02-08 2038 m	Cementing Issue	Critical	Cement returns were below planned percentage. Mitigation: Use staged cementing response when returns deteriorate. Lesson: Volume imbalance is an important cement-placement warning.
2016-11-25 686 m	Pressure Spike	High	Short-duration high-pressure excursion was recorded. Mitigation: Check solids loading and BHA hydraulics before drilling ahead. Lesson: Correlate pressure anomalies with flow before escalating risk.
2017-01-01 1373 m	Mud Loss	High	Partial returns observed at shale shaker. Mitigation: Spot graded LCM pill and circulate at reduced rate. Lesson: Track flow balance and pit volume trend before losses become severe.
2017-01-07 1483 m	NPT	High	Drilling parameters were stable but operations were suspended. Mitigation: Maintain critical spares for recurring equipment failures. Lesson: Consistent NPT coding enables meaningful cross-well comparison.
2017-01-23 1768 m	NPT	High	ROP dropped to zero during equipment unavailability. Mitigation: Classify NPT cause consistently for offset-well learning. Lesson: Recurring equipment downtime should influence planning and spares.

Completion Summary

The synthetic well reached 2251 m MD in the Tipam interval. The NWIS knowledge record links 9 historical operational events to depth-matched telemetry. Risk classification is derived from formation, depth, trajectory and event history rather than formation alone.

This report is generated solely for SIH/NWIS prototyping and model development.
