Significant Historical Events and Lessons

Date / Depth	Event	Severity	Evidence / mitigation / lesson
2017-05-03 718 m	Torque Spike	High	Rotary speed fluctuated during constant pump rate. Mitigation: Reduce WOB/RPM and circulate before resuming normal parameters. Lesson: Torque-rate change is a useful precursor even when pressure is stable.
2017-08-21 1936 m	Mud Loss	High	Intermittent circulation losses developed while drilling ahead. Mitigation: Reduce ECD, treat losses with LCM and confirm stable returns. Lesson: Track flow balance and pit volume trend before losses become severe.
2017-08-23 1962 m	Cementing Issue	High	Observed returns did not match calculated displacement. Mitigation: Control displacement rate and reconcile pumped/returned volumes. Lesson: Plan conservative displacement rate in weak formations.
2017-04-04 368 m	Kick	Medium	Unexpected background gas rise preceded influx. Mitigation: Maintain trip margin and use conservative connection practices. Lesson: Treat pit gain plus gas increase as an early influx indicator.
2017-04-12 465 m	Stuck Pipe	Medium	Rotary movement deteriorated progressively. Mitigation: Apply approved freeing procedure and avoid excessive overpull. Lesson: Rising torque plus falling ROP should trigger hole-cleaning action.
2017-05-22 941 m	Mud Loss	Medium	Partial returns observed at shale shaker. Mitigation: Reduce ECD, treat losses with LCM and confirm stable returns. Lesson: Track flow balance and pit volume trend before losses become severe.
2017-06-23 1300 m	NPT	Medium	ROP dropped to zero during equipment unavailability. Mitigation: Classify NPT cause consistently for offset-well learning. Lesson: Consistent NPT coding enables meaningful cross-well comparison.

Completion Summary

The synthetic well reached 2039 m MD in the Girujan interval. The NWIS knowledge record links 14 historical operational events to depth-matched telemetry. Risk classification is derived from formation, depth, trajectory and event history rather than formation alone.

This report is generated solely for SIH/NWIS prototyping and model development.
