Significant Historical Events and Lessons

Date / Depth	Event	Severity	Evidence / mitigation / lesson
2018-02-19 589 m	Mud Loss	Critical	Flow-out dropped below flow-in with pit loss. Mitigation: Reduce ECD, treat losses with LCM and confirm stable returns. Lesson: Prepare LCM package before approaching correlated offset-well loss depth.
2018-03-14 1382 m	Fishing Operation	High	Normal pipe-recovery attempts were unsuccessful. Mitigation: Maintain clear event chronology and NPT accounting during recovery. Lesson: Early stuck-pipe escalation may reduce probability of fishing.
2018-03-19 1541 m	Mud Loss	High	Partial returns observed at shale shaker. Mitigation: Reduce ECD, treat losses with LCM and confirm stable returns. Lesson: Prepare LCM package before approaching correlated offset-well loss depth.
2018-03-27 1792 m	Stuck Pipe	High	Torque and drag increased while ROP declined. Mitigation: Reduce ROP and increase circulation before high-angle interval. Lesson: Use offset stuck-pipe depth to increase circulation and reaming frequency.
2018-04-09 2194 m	Torque Spike	High	High torque developed while WOB remained elevated. Mitigation: Use staged parameter reduction to avoid torsional oscillation. Lesson: Torque-rate change is a useful precursor even when pressure is stable.
2018-04-19 2513 m	Pressure Spike	High	Circulating pressure climbed without equivalent torque change. Mitigation: Reduce pump rate, verify restriction and restore circulation gradually. Lesson: Rate-of-change in pressure is more informative than a fixed threshold.
2018-02-15 448 m	NPT	Medium	Drilling parameters were stable but operations were suspended. Mitigation: Classify NPT cause consistently for offset-well learning. Lesson: Separate geological risk from equipment-driven NPT in analytics.

Completion Summary

The synthetic well reached 3053 m MD in the Kopili interval. The NWIS knowledge record links 13 historical operational events to depth-matched telemetry. Risk classification is derived from formation, depth, trajectory and event history rather than formation alone.

This report is generated solely for SIH/NWIS prototyping and model development.
