Significant Historical Events and Lessons

Date / Depth	Event	Severity	Evidence / mitigation / lesson
2000-03-19 683 m	Stuck Pipe	High	High drag was recorded while circulating remained possible. Mitigation: Apply approved freeing procedure and avoid excessive overpull. Lesson: Rising torque plus falling ROP should trigger hole-cleaning action.
2000-04-04 929 m	Pressure Spike	High	Pressure trend exceeded recent moving baseline. Mitigation: Condition hole and confirm pressure normalization. Lesson: Rate-of-change in pressure is more informative than a fixed threshold.
2000-05-02 1355 m	Torque Spike	High	Sharp torque excursion occurred with RPM instability. Mitigation: Reduce WOB/RPM and circulate before resuming normal parameters. Lesson: Use offset torque trend to set adaptive operating envelope.
2000-06-14 1981 m	Cementing Issue	High	Displacement pressure became unstable. Mitigation: Use staged cementing response when returns deteriorate. Lesson: Plan conservative displacement rate in weak formations.
2000-03-02 418 m	Fishing Operation	Medium	BHA retrieval required specialized tools. Mitigation: Use approved fishing program with controlled overpull and circulation. Lesson: Capture retrieval outcome as institutional knowledge.
2000-03-22 727 m	Fishing Operation	Medium	Mechanical obstruction prevented normal drilling progression. Mitigation: Confirm fish geometry before selecting retrieval tool. Lesson: Early stuck-pipe escalation may reduce probability of fishing.
2000-03-24 763 m	Torque Spike	Medium	Torque rose without corresponding pressure anomaly. Mitigation: Use staged parameter reduction to avoid torsional oscillation. Lesson: Torque-rate change is a useful precursor even when pressure is stable.

Completion Summary

The synthetic well reached 2358 m MD in the Girujan interval. The NWIS knowledge record links 11 historical operational events to depth-matched telemetry. Risk classification is derived from formation, depth, trajectory and event history rather than formation alone.

This report is generated solely for SIH/NWIS prototyping and model development.
