Significant Historical Events and Lessons

Date / Depth	Event	Severity	Evidence / mitigation / lesson
2013-03-05 858 m	Mud Loss	High	Flow-out dropped below flow-in with pit loss. Mitigation: Stage circulation and monitor pit volume before resuming drilling. Lesson: Prepare LCM package before approaching correlated offset-well loss depth.
2013-04-15 1505 m	Torque Spike	High	High torque developed while WOB remained elevated. Mitigation: Ream and condition hole if torque remains elevated. Lesson: Torque-rate change is a useful precursor even when pressure is stable.
2013-02-02 335 m	Torque Spike	Medium	Rotary speed fluctuated during constant pump rate. Mitigation: Use staged parameter reduction to avoid torsional oscillation. Lesson: Use offset torque trend to set adaptive operating envelope.
2013-03-05 867 m	NPT	Medium	ROP dropped to zero during equipment unavailability. Mitigation: Verify equipment health before resuming drilling. Lesson: Consistent NPT coding enables meaningful cross-well comparison.
2013-03-08 915 m	Fishing Operation	Medium	Mechanical obstruction prevented normal drilling progression. Mitigation: Confirm fish geometry before selecting retrieval tool. Lesson: Early stuck-pipe escalation may reduce probability of fishing.
2013-04-14 1496 m	Kick	Medium	Flow-out exceeded flow-in and gas units increased. Mitigation: Maintain trip margin and use conservative connection practices. Lesson: Treat pit gain plus gas increase as an early influx indicator.
2013-04-18 1551 m	Torque Spike	Medium	Torque rose without corresponding pressure anomaly. Mitigation: Use staged parameter reduction to avoid torsional oscillation. Lesson: Avoid simultaneous high WOB and high RPM in correlated interval.

Completion Summary

The synthetic well reached 2163 m MD in the Girujan interval. The NWIS knowledge record links 11 historical operational events to depth-matched telemetry. Risk classification is derived from formation, depth, trajectory and event history rather than formation alone.

This report is generated solely for SIH/NWIS prototyping and model development.
