Significant Historical Events and Lessons

Date / Depth	Event	Severity	Evidence / mitigation / lesson
2022-04-07 1800 m	Pressure Spike	Critical	Short-duration high-pressure excursion was recorded. Mitigation: Use pressure trend thresholds referenced to depth and flow rate. Lesson: Correlate pressure anomalies with flow before escalating risk.
2022-01-18 526 m	Mud Loss	High	Partial returns observed at shale shaker. Mitigation: Optimize hydraulics and maintain conservative ROP through loss interval. Lesson: Prepare LCM package before approaching correlated offset-well loss depth.
2022-03-14 1423 m	Kick	High	Unexpected background gas rise preceded influx. Mitigation: Shut in, verify influx and circulate using approved well-control procedure. Lesson: Escalate connection-gas trends before entering correlated pressure zone.
2022-03-17 1485 m	Torque Spike	High	Rotary speed fluctuated during constant pump rate. Mitigation: Ream and condition hole if torque remains elevated. Lesson: Use offset torque trend to set adaptive operating envelope.
2022-03-29 1662 m	Kick	High	Unexpected background gas rise preceded influx. Mitigation: Maintain trip margin and use conservative connection practices. Lesson: Escalate connection-gas trends before entering correlated pressure zone.
2022-04-08 1815 m	Stuck Pipe	High	Torque and drag increased while ROP declined. Mitigation: Improve hole cleaning, work pipe and back-ream within operating envelope. Lesson: Avoid prolonged static periods in high-drag interval.
2022-04-09 1838 m	Kick	High	Flow-out exceeded flow-in and gas units increased. Mitigation: Shut in, verify influx and circulate using approved well-control procedure. Lesson: Treat pit gain plus gas increase as an early influx indicator.

Completion Summary

The synthetic well reached 2348 m MD in the Girujan interval. The NWIS knowledge record links 16 historical operational events to depth-matched telemetry. Risk classification is derived from formation, depth, trajectory and event history rather than formation alone.

This report is generated solely for SIH/NWIS prototyping and model development.
