Significant Historical Events and Lessons

Date / Depth	Event	Severity	Evidence / mitigation / lesson
2003-12-28 1519 m	Cementing Issue	Critical	Cement density/returns trend indicated placement uncertainty. Mitigation: Verify cement placement using pressure and volume balance. Lesson: Offset loss history should inform cementing hydraulics.
2003-10-12 554 m	Stuck Pipe	High	Hookload became erratic during pipe movement. Mitigation: Apply approved freeing procedure and avoid excessive overpull. Lesson: Use offset stuck-pipe depth to increase circulation and reaming frequency.
2003-10-17 618 m	Mud Loss	High	Intermittent circulation losses developed while drilling ahead. Mitigation: Stage circulation and monitor pit volume before resuming drilling. Lesson: Track flow balance and pit volume trend before losses become severe.
2003-11-08 902 m	Fishing Operation	High	BHA retrieval required specialized tools. Mitigation: Review BHA failure mode before resuming drilling. Lesson: Capture retrieval outcome as institutional knowledge.
2003-11-11 950 m	Torque Spike	High	Sharp torque excursion occurred with RPM instability. Mitigation: Monitor torque derivative rather than absolute torque alone. Lesson: Use offset torque trend to set adaptive operating envelope.
2003-12-02 1204 m	Kick	High	Unexpected background gas rise preceded influx. Mitigation: Re-establish overbalance and monitor pit/flow balance. Lesson: Escalate connection-gas trends before entering correlated pressure zone.
2004-01-03 1590 m	Pressure Spike	High	Pressure trend exceeded recent moving baseline. Mitigation: Condition hole and confirm pressure normalization. Lesson: Rate-of-change in pressure is more informative than a fixed threshold.

Completion Summary

The synthetic well reached 2126 m MD in the Girujan interval. The NWIS knowledge record links 16 historical operational events to depth-matched telemetry. Risk classification is derived from formation, depth, trajectory and event history rather than formation alone.

This report is generated solely for SIH/NWIS prototyping and model development.
